

September 4, 2013, 13.00-16.00
Scheelerummet, Uppsala Biomedical Center (BMC)

Cheminformatics Hackathon

with the Chemistry Development Kit and Bioclipse

Contents

Bioclipse (www.bioclipse.net) and the Chemistry Development Kit (CDK, cdk.sf.net) are two prominent software applications for cheminformatics. This hackathon is open for anyone who wishes to do practical work for using and developing cheminformatics applications with these frameworks. The agenda is open and will be fixed on site, but part of the time will be devoted to communicating the latest developments of the frameworks on a technical level with practical exercises and bug fixing.

Organizers:

Ola Spjuth
Department of Pharmaceutical Biosciences
Uppsala University
Sweden

Egon Willighagen
Department of Bioinformatics - BiGCaT
Maastricht University
The Netherlands
